

Connecting the Santa Clara Neighborhood and the West Bank Bike Path Proposal, March 2016

This proposal, from the Santa Clara Community Organization (SCCO), is aimed at meeting the goal of connecting the Willamette River West Bank Bike Path to the Santa Clara neighborhood proper. This will allow both scenic and commuter bike routes that bypass River Road through to the northern Urban Growth Boundary at East Beacon Drive. The proposed primary scenic route (solid pink lines on the attached map) provides access to the river, local farms, parks and schools, as well as the Luper Pioneer Cemetery historic site. Dashed (green) lines on the map show commuter routes that more directly connect to the existing river path at Division and Beaver, and local shopping along Division Avenue. Further, this will allow motorists, bicyclists and pedestrians some respite from having to contend with the heavy congestion and hazards of traveling such a busy traffic corridor as River Road is today.

The attached spreadsheet describes in detail the sign types at over 50 locations along these routes. Most signs could be mounted on existing signposts. In addition to the route-marking signs it is also recommended that the pavement be marked with bike path symbols. This may reduce the number of signs and help keep riders on the main routes.

SCCO is ready to initiate next steps in cooperation with Lane County and the City of Eugene to coordinate this project and achieve this goal by the end of 2016.
